From Graduation to a Healthcare Career

When Corrieonna joined the PATH program, she held a clear goal: finishing high school. She enrolled in Vision for My Life to earn her diploma. Though it was a major barrier, she didn't face it alone.

With PATH's support, she re-enrolled, stayed motivated, and overcame challenges. On September 13, 2025, she received her high school diploma, a milestone of academic and personal achievement.

The PATH program played a pivotal role in her journey, offering barrier resolution services and ongoing support that helped her stay focused and empowered. Her story is a testament to what's possible when determination meets opportunity.

Now, she's ready to conquer her next goal, taking the first step towards a career in healthcare by enrolling in phlebotomy training at Soaring CNA Training Center, with classes beginning on October 20, 2025; this next step will help her earn the credentials needed to pursue employment in the healthcare field, a path she's deeply passionate about.

Her journey continues, and we couldn't be prouder of the progress she's made and the future she's building.
